

## Washtenaw County 2023 Community Survey Demographics

This is a summary of self-reported demographic information for 993 Washtenaw County community members who participated in our 2023 community survey. Multiple responses were allowed for some of the demographic questions, as specified below, therefore the count of responses exceeds the total number of survey respondents for some of the following categories.

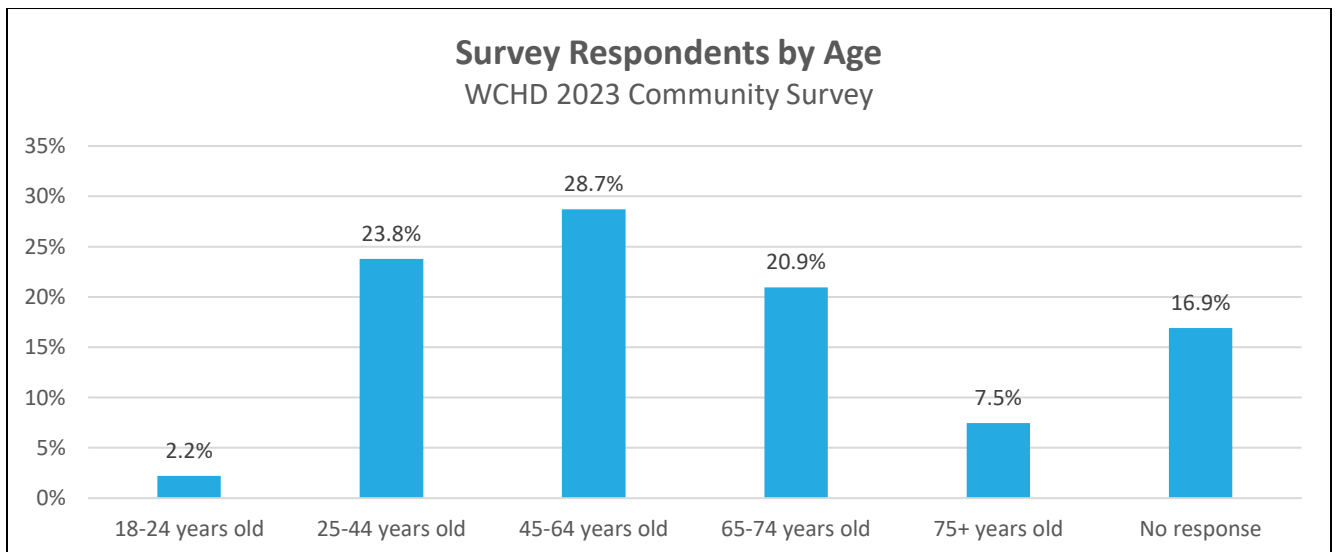

### Race/Ethnicity

Community survey respondents were asked to identify which Racial/Ethnic category best describes them. Respondents were able to select multiple options and a total of 1,041 responses are summarized below. This question was skipped by 162 respondents.

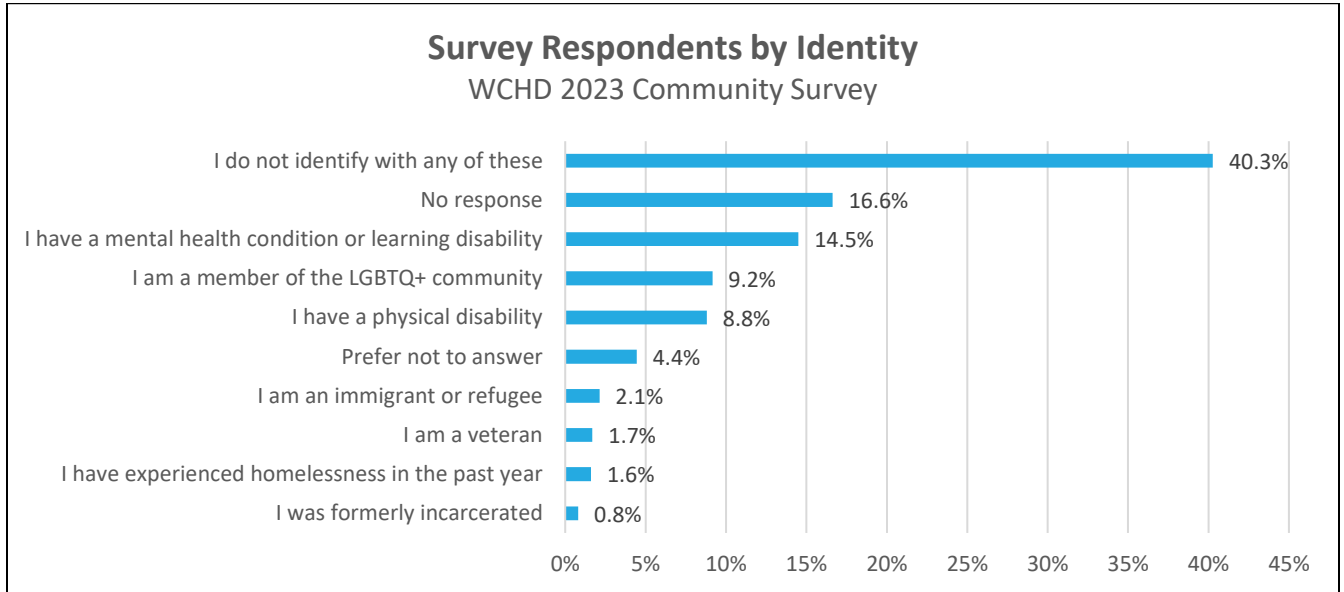

### Age

Community survey respondents were asked to identify which category best captures their age. Of 993 total respondents, 168 respondents did not provide this information.

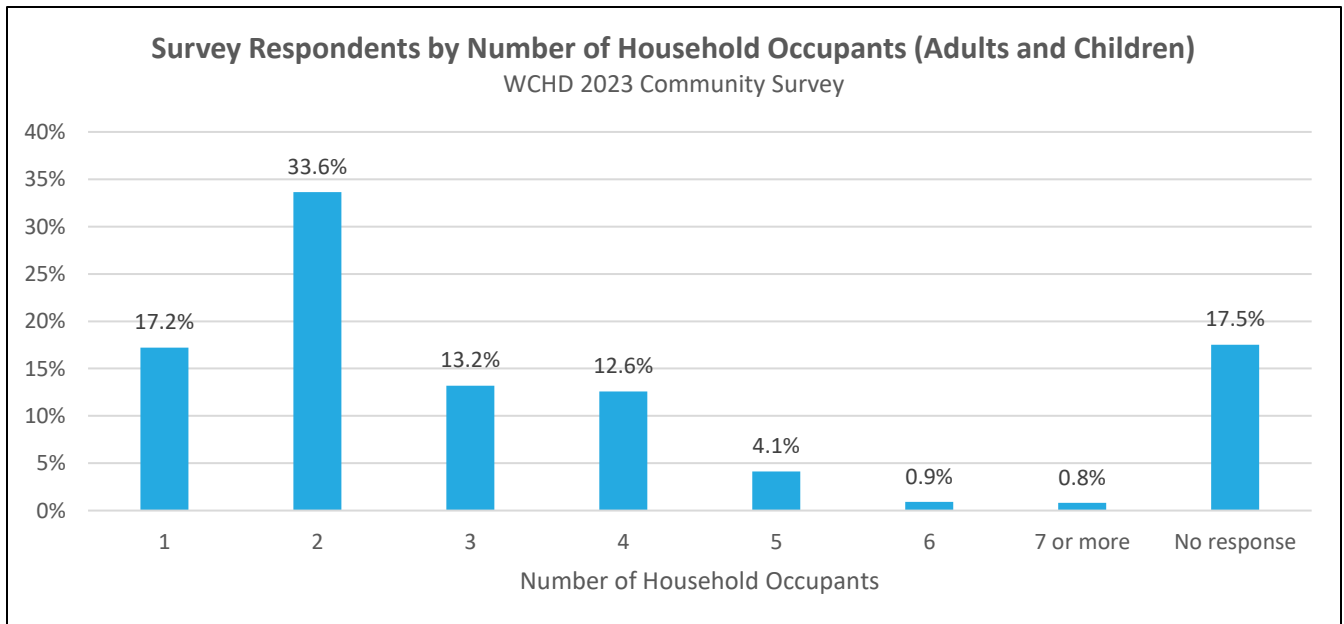

## Identity

Community survey respondents were asked to identify which, if any, statements they identified with. Multiple selections were allowed, and 1125 responses are summarized below. A total of 168 respondents did not provide this information.

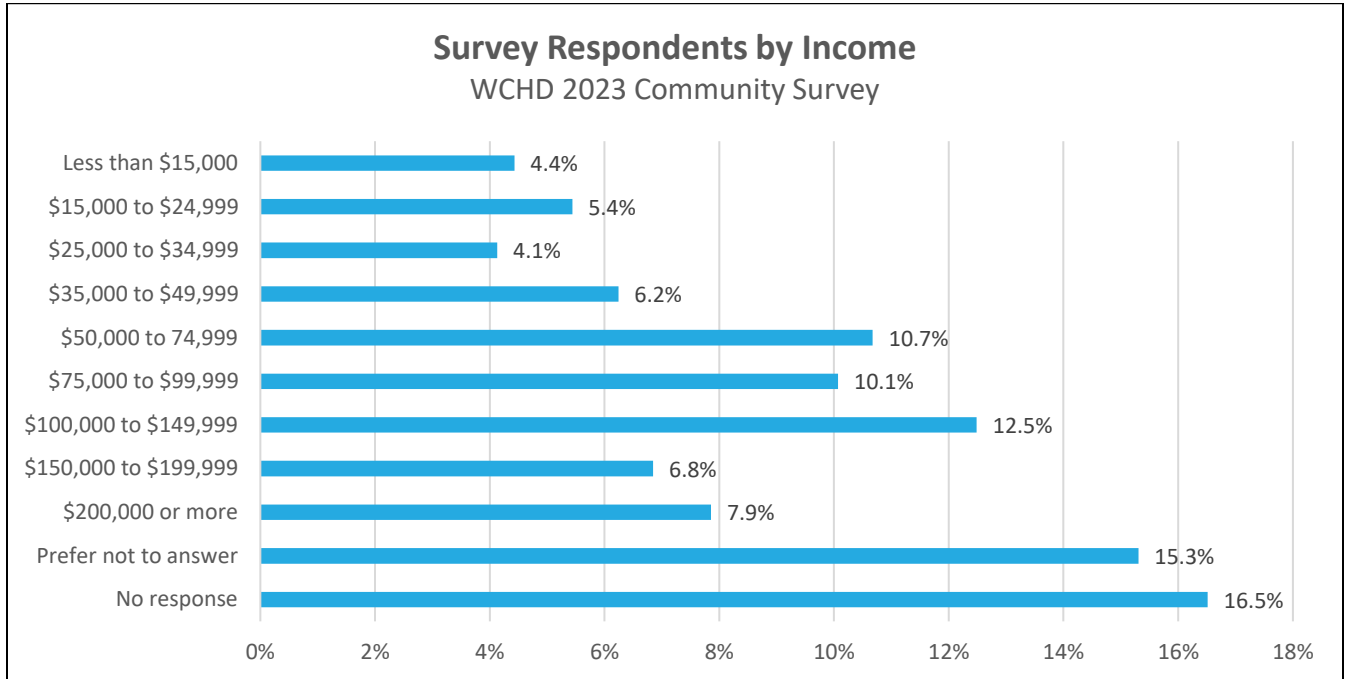

## Household Members

Community survey respondents were asked to identify how many individuals, including themselves, live in their household. Of 993 total respondents, 174 respondents did not provide this information.

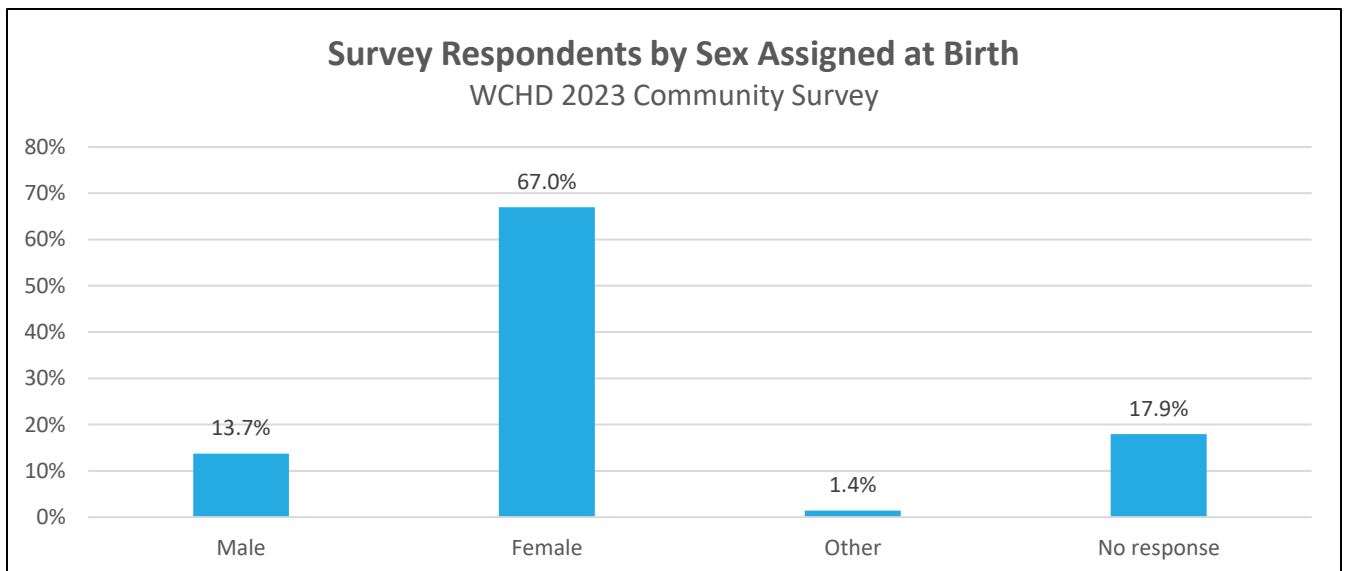

## Income

Community survey respondents were asked to identify which of the following ranges captures total income earned from all household members in the past year. Of 993 total respondents, 164 respondents did not provide this information.

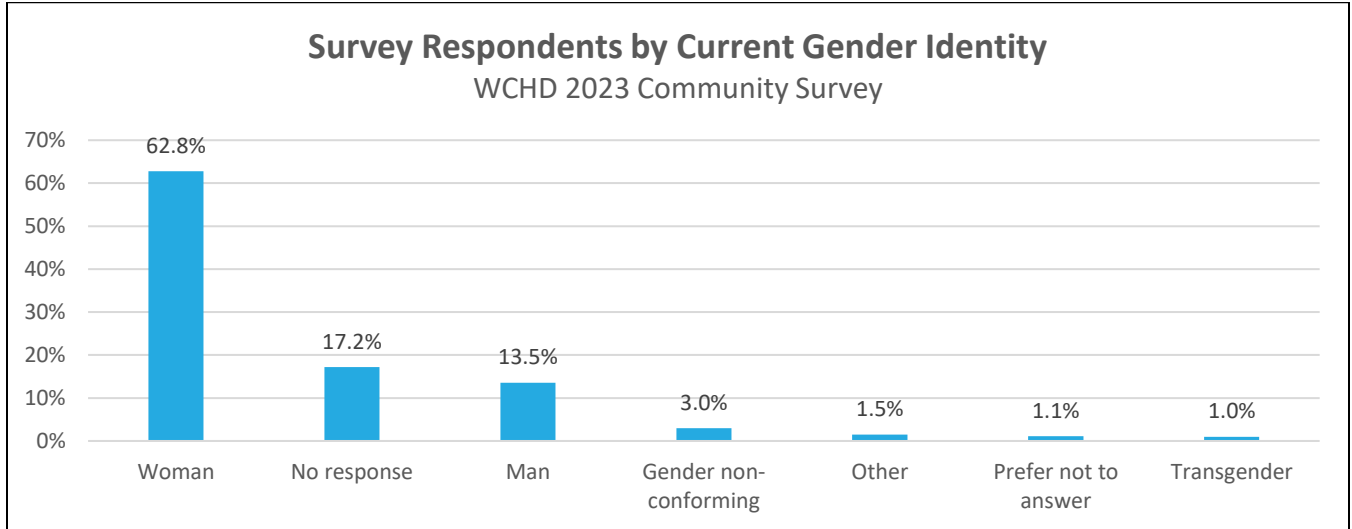

## Sex Assigned at Birth

Community survey respondents were asked to identify which category best captures their sex assigned at birth. Of 993 total respondents, 178 respondents did not provide this information.

## Gender Identity

Community survey respondents were asked to identify how they would best describe their current gender identity. Multiple selections were allowed and a total of 1,013 responses are summarized below. This question was skipped by 174 survey participants.

## Zip Code

Community survey respondents were asked to provide the zip code that corresponds with their residence. Of 993 total respondents, 162 respondents did not provide this information.
